QUARTZ COUNTERTOPS

BELOW ARE A FEW REMINDERS ABOUT YOUR NEW LAMINATE COUNTERTOPS

CLEANING – Simply wash countertops with a soft cotton cloth and warm water. You can use a mild soap if desired. It is possible for certain chemicals and cleansers to ruin the finish. If such liquids are spilled on the countertops, they should be wiped off immediately with soap and water. **DO NOT USE** nail polish remover, permanent markers, inks, oil soaps, furniture cleaners, or paint strippers on the countertop. Also, avoid using high alkaline / PH level cleaners, such as oven cleaners, on the countertop.

CARE – Quartz countertops are designed for beauty and durability. Like any surfacing materials, they can be damaged by abuse and carelessness. When used as recommended with proper use and care, the end result is years of satisfaction. Quartz countertops should not be used as a cutting surface. The use of cutting boards is recommended. Thermal shock or cracks may occur if the countertop is subject to extreme temperature changes. It is recommended that you protect your countertop from extreme heat by using trivets or hot pads. **DO NOT** seal quartz countertops. Sealing quartz will cause the countertop to become dull looking and ruin the shiny finish. **DO NOT** chop, slice, pound, or hammer on any quartz surface.
